Cybersecurity and Identity Theft

What is Cybersecurity?

Cybersecurity is...

- ✓ The practice of protecting critical systems and sensitive information from digital attacks. - IBM
- ✓ The practice of protecting systems, networks, and programs from digital attacks. These cyberattacks are usually aimed at accessing, changing, or destroying sensitive information; extorting money from users; or interrupting normal business processes. - Cisco
- ✓ The body of technologies, processes, and practices designed to protect networks, devices, programs, and data from attack, damage, or unauthorized access. - Digital Guardian
